

How to install the Inventorum App:

To help you if your iPad language is German, the document indicates button titles in both German and English.

Please visit the website
<http://www.testflightapp.com> on your
iPad and click the "LogIn" button (not
the "SignUp" button, since we've
already registered an account for
you).

Now, enter your email address and the password from the registration email we sent you and click on the green "Login" button.

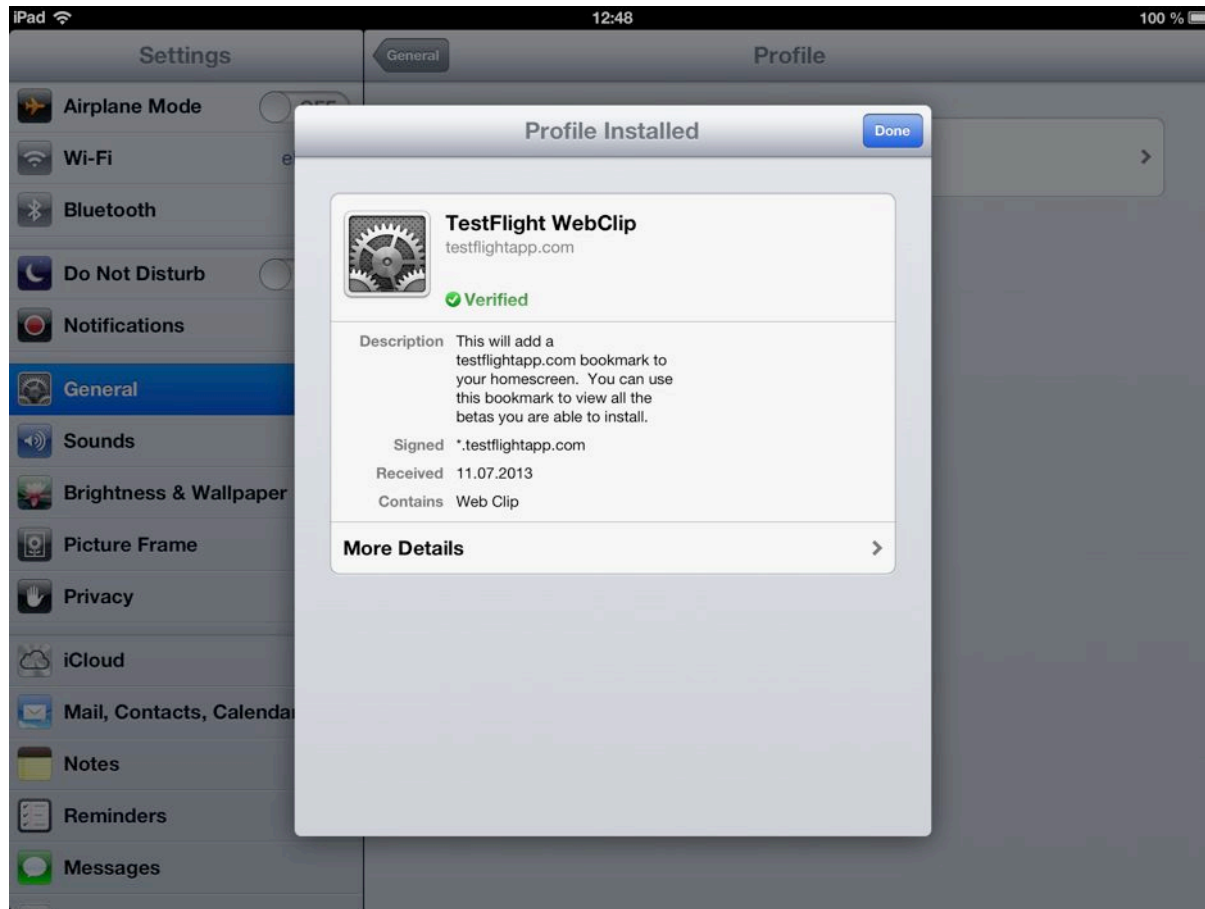

You are now logged into TestFlight. The System will ask you to connect your iPad with TestFlight. To proceed, please click the green "*Connect Device*" button.

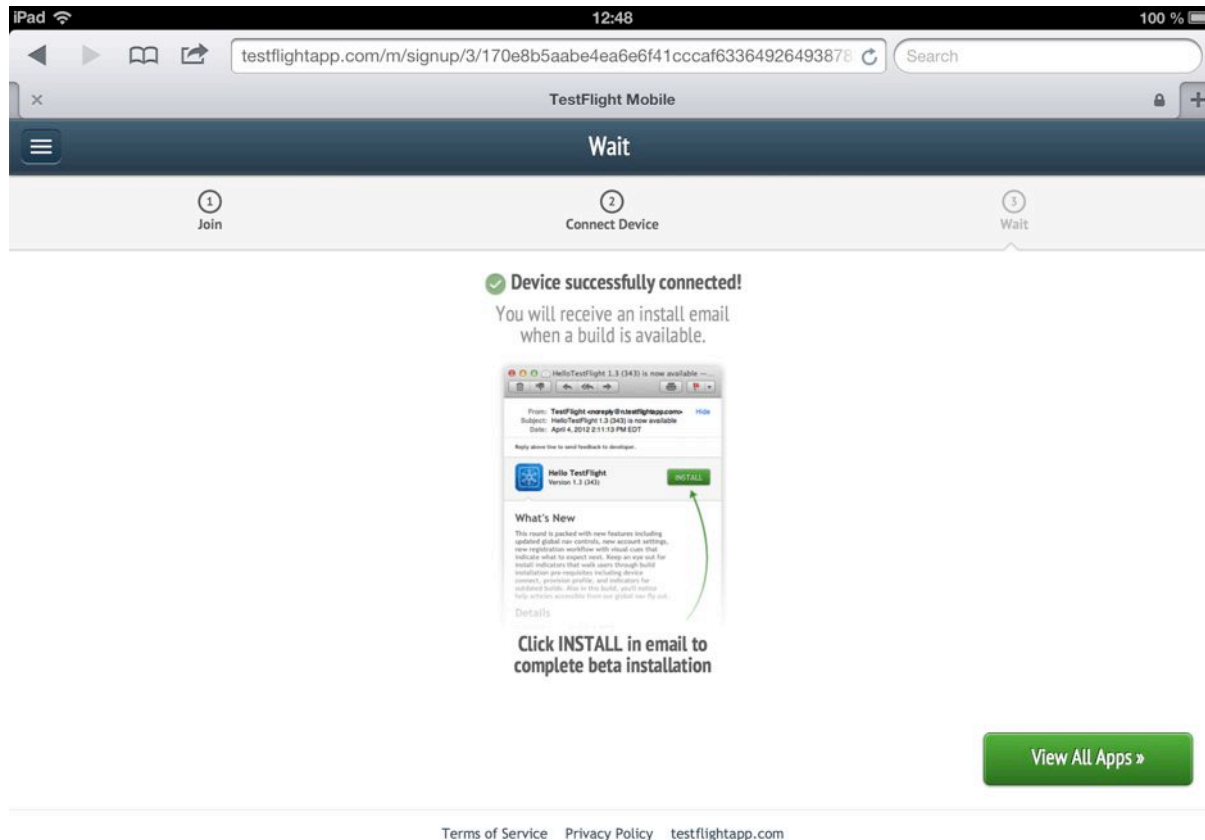

TestFlight automatically launches
"Profil installieren" (DE) or *Settings*
(EN), so that you can proceed with the
installation.

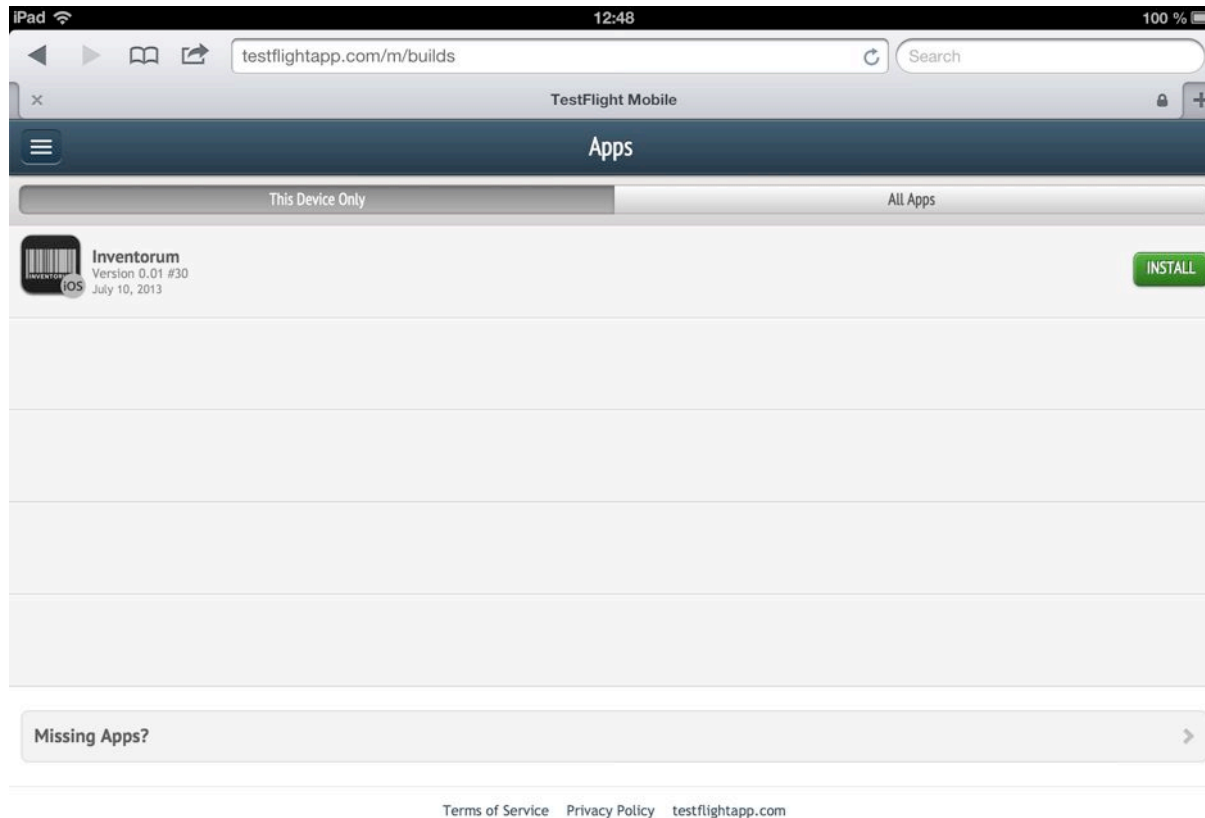

Please confirm this process by clicking on "*Install* (EN)" or "*Installieren*" (DE).

After a short moment your new TestFlight profile will have been created. To confirm this step, please click on "*Done*" (EN) or "*Fertig*" (DE).

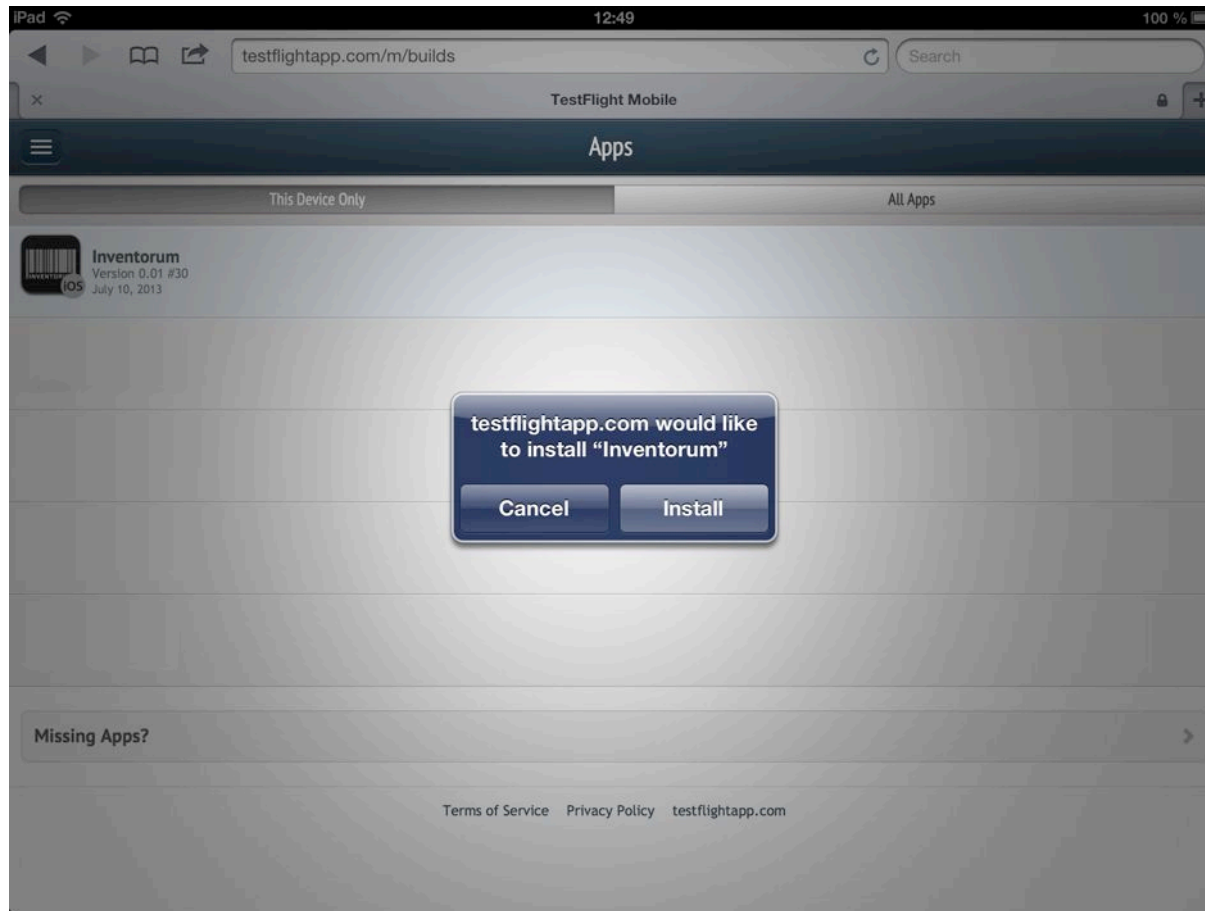

You will automatically be directed to the TestFlight tab on your browser and after a short moment TestFlight will recognize your iPad. It is now all connected. By clicking *"View All Apps"* you can open the App, which is now on your iPad screen as well.

You are now in the mobile version of TestFlight.

It can take 1-2 hours for the App to become active, sometimes longer outside our office hours.

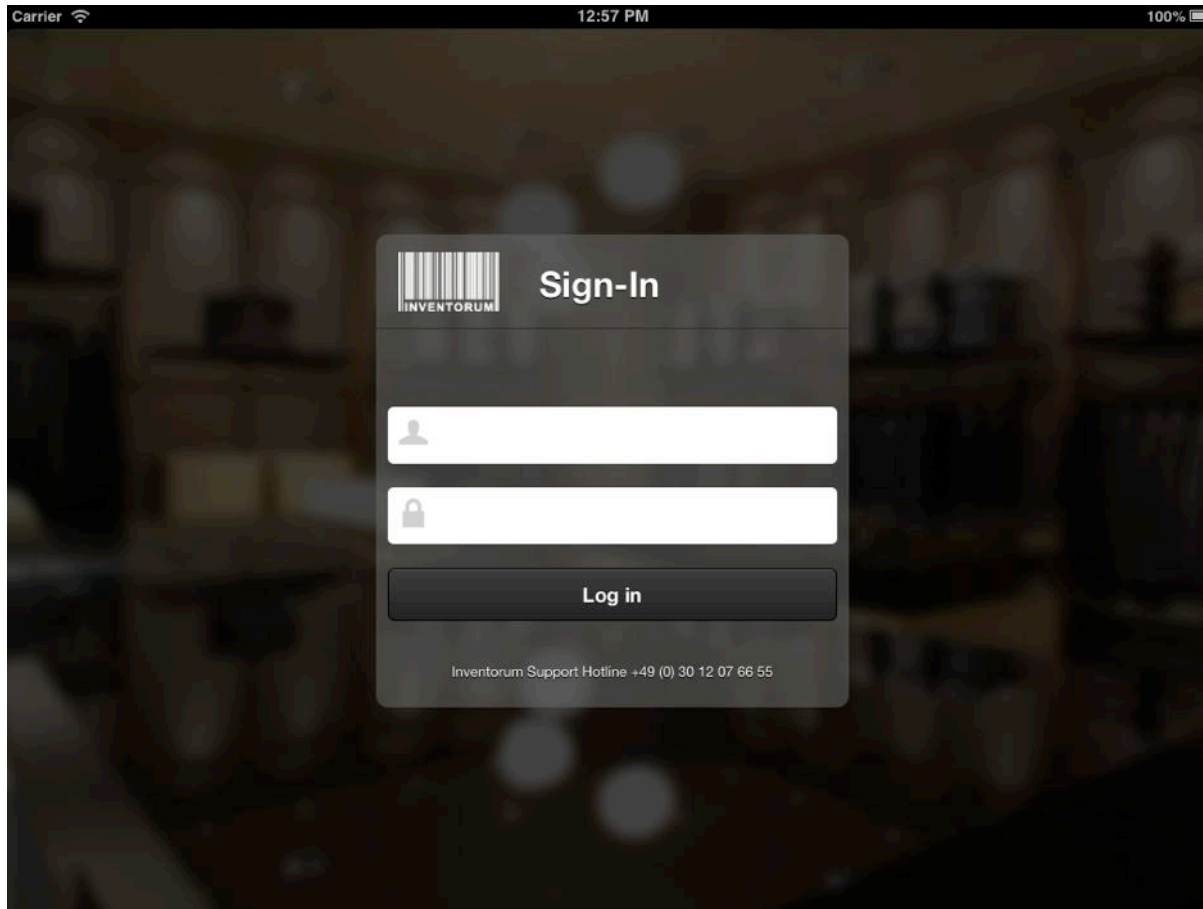

Once the App is enabled you will see it listed. You can now download the Inventorum Beta version by clicking on the "Install" button.

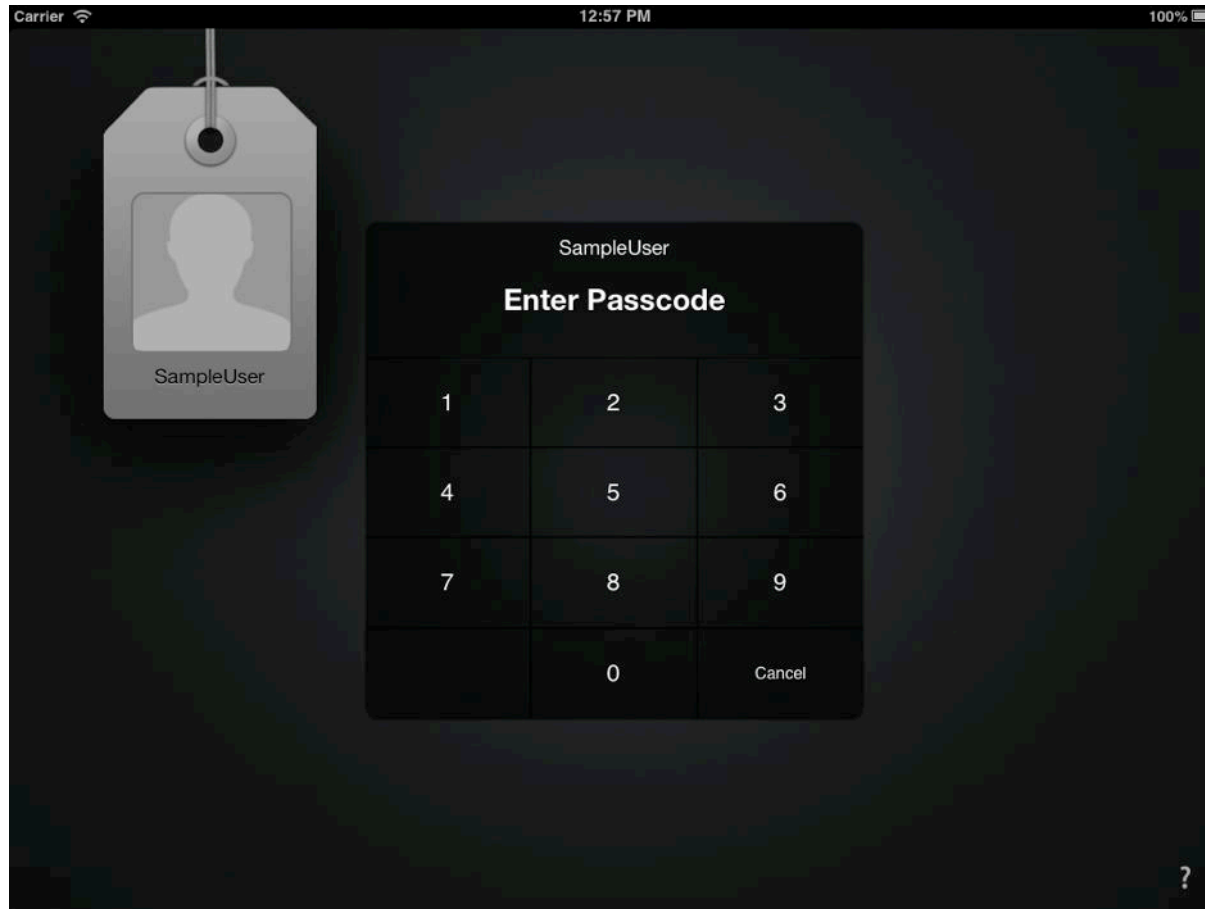

After a second confirmation, click “*Installieren*” (DE) or “*Install*” (EN), the App will be downloaded and installed.

Here you can see your iPad start screen with the two Apps you just installed: TestFlight and Inventorum.

When opening the Inventorum App for the first time, you will be directed to the SignIn Screen, where you have to enter your email address and the standard password Inventorum2013.

Once logged into your main account, you can select your user by tipping on the icon, log in with the PassCode 1111 and start exploring!
